

Deposit Return Scheme for Cans III

For Producers & Importers

1 November 2022 Raymond Gianotten

Preliminary comments:

- The usual competition rules apply.
- The presentation will be sent and translated into English.
- Questions via info@statiegeldnederland.nl
- Please provide your email address via info@statiegeldnederland.nl for future contact.

Can deposit scheme start date

Helene van Zutphen
1 November 2022

From 1 April 2023, there will be a robust and consumer-friendly system for can collection

- This is three months later than the legally intended date of implementation. The Waste Fund has already indicated that we are the ILT contact point for monitoring and enforcement of this and will provide support to individual producers and importers in various ways in case they are confronted with possible monitoring or enforcement.
- This therefore means that from 1 April 2023 onwards, we will have to get moving on beverage can deposits **as soon as possible**, in order to keep the delay as short as possible compared to the legally intended date of implementation.
- We cannot mention **any transition date** or deadline, as there is already a delay compared to the legally intended date of implementation.

The 2 main reasons why we can guarantee a good nationwide collection scheme from 1 April 2023 are:

- Adjustments to the IT system will then be ready.
- Adjustments to the counting and distribution centres will then be ready.
- It can only be done once, so there is no point in starting earlier.

The Waste Fund is the ILT point of contact for monitoring and enforcement

- Where appropriate, the Waste Fund will inform, advise and provide substantive input, both factually and legally, to individual producers and importers.
- This input can serve as input to ILT.
- The Waste Fund will coordinate the responses and will ensure that in the event of enforcement, this should focus exclusively on the Waste Fund and not on individual companies.

Introduction

- Statutory obligation to levy €0.15 deposit on cans.
- Mandatory participation in the deposit return scheme (Statiegeld NL).
- All cans must be provided with a deposit logo and a new EAN code*.
- The P/I pays a producer contribution to Statiegeld NL (via AFV) based on a periodic statement of the products placed on the market.
- In addition, the waste management contribution is paid to AFV (in the usual manner).
- All rights and obligations are set out in the Deposit Scheme Bottles and Metal Beverage Packaging Policy.

*There are exceptions for not changing the EAN.

Previous session: Checklist for deposit on beverage cans

One-off steps to be taken for producers/importers (P/I)

Recurring steps to be taken by P/I's

Every 4-4-5 weeks

Annually before 1 april

Factsheet with all steps for P/Is

On which products is a deposit required?

NOTA VAN TOELICHTING

3. Maatregelen voor metalen drankverpakkingen

verpakkingen zuivl voor producenten en importeurs van kunststof drankflessen.

Belangrijkste verschil is dat het statiegeldstelsel voor metalen drankverpakkingen betrekking heeft op metalen verpakkingen voor alle soorten drank. Anders dan voor kunststof flessen is er geen technische reden om metalen verpakkingen voor sap en zuivel uit te zonderen. Blikjes met frisdrank, water, sap, zuivel, bier (met en zonder alcohol) en alcoholhoudende drank (zoals cider en breezers) vallen hierdoor onder het statiegeldstelsel voor metalen drankverpakkingen. Deze verpakkingen worden ook in substantiële aantallen in het zwerfafval teruggevonden.

De verplichtingen in dit besluit hebben betrekking op drankverpakkingen waarvan een metaal soort of een mengsel daarvan het hoofdbestanddeel vormt. Knijpverpakkingen, drankkartons en dergelijke vallen hiermee niet onder de verlichtingen zolang metaal (folie) niet het hoofdbestanddeel van de verpakking vormt. Hiermee wordt aangegeven bij

Besluit van 30 april 2021, houdende wijziging van het Besluit beheer verpakkingen 2014 in verband met het opnemen van een doelstelling voor gescheiden inzameling van metalen drankverpakkingen en het invoeren van statiegeld op metalen drankverpakkingen (Besluit maatregelen metalen drankverpakkingen)

Who is the Producer/Importer?

The following applies to the P/I: all benefits and expenses such as registration, remittance, other obligations, ownership of material. There is no lower limit; the obligation applies from the first can.

With effect from 2023, the main rule is:

Production in the Netherlands:

- Own brand producer: producer is responsible
- Producer is not a brand owner: brand owner established in the Netherlands (who commissions production) is responsible

Production outside of the Netherlands

- Importer established in the Netherlands is responsible (irrespective of brand)
- Unless direct (internet) sales to Dutch consumers: in this case, the importer established abroad is responsible

Customised agreement: There will be a possibility for deferral. The terms and conditions will be rewritten. From 2023 this runs via the Packaging Waste Fund. (more info via info@afvalfondsverpakkingen.nl)

Link to a presentation of the AFV regarding the legislative amendment of who the P/I is. <https://www.youtube.com/watch?v=PNMMYQPcxPA>

Production in the Netherlands

Producer is brand owner:

- NL producer delivers to customer in NL
- NL producer charges deposit
- NL producer registers with Statiegeld NL, registers EAN code and submits periodic statement
- NL producer pays deposit money and producer contribution to Statiegeld NL (levy part of the waste management contribution to Packaging Waste Fund)
- NL producer is entitled to material

This also applies to an NL company that is not a producer but is a brand owner.

→ Deferral of obligations is possible with a customised agreement. This will be available shortly at AFV
(info@afvalfondsverpakkingen.nl)

Samples, free distribution? Nevertheless, deposit money must be paid and the deposit money can be collected by the consumer.

Import

- An NL company buys a can abroad (NL company is then the importer). This can also be filled PL.
- Importer charges deposit on sales in NL
- Importer registers with Statiegeld NL, registers EAN code and submits periodic statement
- Importer pays deposit and producer contribution to Statiegeld NL (via AFV)
- Importer is entitled to material

→ A foreign company is therefore in principle not a P/I that reports to Statiegeld NL. However, this is possible with a customised agreement.

- Consumer as importer (webshop abroad): webshop is P/I.
- Import for the purpose of export (so the can is not placed on NL market): no statement required.

Export and indirect export

Export

- NL producer sells a can directly abroad
- Can is not placed on NL market (so will not be bought first from another NL company)
- No deposit and levy due

Indirect export

- If this was paid off earlier (because it was purchased from an NL company), this can be reclaimed: indirect export. Producer contribution will also be reimbursed.
- Please note: a risk markdown of 5% applies to indirect exports.
- The Policy specifies the information that must be provided (see next slide)
- An accountant's declaration is required annually on the indirect import statement.

Only direct export is exempt from the deposit scheme.

Indirect export

Netherlands Packaging Waste Fund Deposit Scheme Bottles and Can Packaging Policy

7.0 Restitutie en Overige Creditering

7.1 Restitutie

1. Een Exporteur van Statiegeldflessen en/of Metalen Drinkverpakkingen kan aan Statiegeld Nederland een verzoek doen om de bijdragen uit hoofde van de Statiegeldcomponent en de Systeemcomponent die door een Producent of Importeur aantoonbaar eerder aan Afvalfonds Verpakkingen zijn afgedragen over Statiegeldflessen en/of Metalen Drinkverpakkingen die zijn geëxporteerd, gerestitueerd te krijgen (**Restitutie**).
4. De Exporteur dient de Opgaaf Indirecte Export jaarlijks te onderbouwen door middel van een accountantsverklaring conform een door Statiegeld Nederland op te stellen controleprotocol. Voornoemde accountantsverklaring dient uiterlijk in het eerste kwartaal na afloop van een kalenderjaar aan Statiegeld Nederland te worden verstrekt. De meest actuele versie van voornoemd controleprotocol zal Statiegeld Nederland als download op haar website beschikbaar stellen.
5. De Opgaaf Indirecte Export over een Opgaveperiode dient ten minste de navolgende gegevens te bevatten:
 - a. de EAN-codes van de door de Exporteur buiten Nederland beschikbaar gestelde Statiegeldflessen en/of Metalen Drinkverpakkingen; en,
 - b. het aantal Grote Statiegeldflessen en/of Kleine Statiegeldflessen en/of Metalen Drinkverpakkingen dat door de Exporteur buiten Nederland is gebracht; en
 - c. de leverancier(s) van de betreffende Grote en/of Kleine Statiegeldflessen en/of Metalen Drinkverpakkingen met vermelding van NAW- gegevens en KvK-nummer(s).
6. Indien een Statiegeldfles en/of een Metalen Drinkverpakking ten aanzien waarvan Restitutie aan de Exporteur heeft plaatsgevonden alsnog in Nederland bij een Innamepunt wordt ingenomen, leidt Statiegeld Nederland schade. Om het risico op dergelijke schade te beperken, heeft Statiegeld een landelijke risicoafslag van 5% vastgesteld.

From week 5: supply product information

- EAN code
- Product name
- Aluminium or steel
- Empty packaging weight
- Length
- Diameter
- Photo
- National or international EAN code
- Date EAN code active

Known to GS1? → most information is read automatically. However, supplementation and verification needed!

Not via GS1? → fill in all information yourself

P/I declares that the information is correct and is liable if this proves not to be the case.

Start of 2023: information session about the producer portal

Registering cans with RVM suppliers

- RVMs check shape (and weight) in addition to EAN code
- Shapes must be supplied to and read in by RVM suppliers
- Statiegeld NL arranges this collectively for the 12-15 most common cans
- A list of these cans will be available shortly.
- Deviating shapes (e.g. an aluminium bottle) must be supplied by the P/I itself (costs follow)

Marketing the materials

- The P/I owns the collected material of its products
- Large P/Is (>80 million cans/year) can market this themselves. These P/Is will be contacted by Statiegeld NL no later than next week.
- For the other P/Is, Statiegeld NL can market the material.
- The proceeds flow back to the P/Is.
- Statiegeld NL regularly checks whether the specified weights are still correct.

Follow-up

The next dial-in session scheduled for P/Is:

13 December 3pm
